Why SplitEase ?

Manual Math Errors

Splitting bills manually leads to miscalculations and disagreements between friends.

Time Consuming

Manually tallying each person's share takes time — especially for large group dinners.

Untracked Payments

No easy way to track who has paid and who still owes money after the event.

No Smart Tool

Existing apps lack OCR-based receipt scanning + group payment tracking in one place.

What is SplitEase?

Scan Receipt

Use OCR + Google Vision API to scan any receipt photo

Split Smart

Assign items to specific people in the group

Track Payments

Monitor who paid and who still owes in real-time

Payment Proof

Upload & verify transfer receipts directly in-app

Methodology

Waterfall

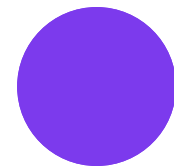

Why this method:

- Fixed & clear project scope
- Fixed timeline (1 semester)
- Reduces wasted development time
- Feedback gathered at set intervals

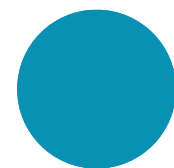

Analisa Kebutuhan

Communication with users via questionnaire

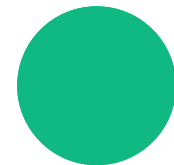

Planning Timeline

Plan timeline based on scope & communication

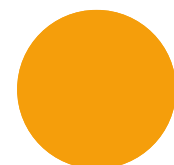

Design System (UI/UX)

System modeling, User Flow design, UI mockups

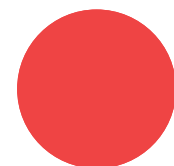

Implementasi (OCR/Backend)

Backend coding & Google Vision API integration

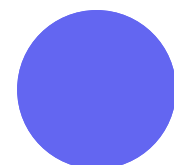

User Testing

Test each feature and gather user feedback

Iterative

Improvements based on user feedback

Deployment

After sufficient iterations, app is deployed

Tech Stack

Platform

Mobile (android)

Programing Language

Kotlin

Frontend

Jetpack Compose

Backend + Database

Google Cloud Vision

FireBase

Key Features

OCR Receipt Scanning

- ✓ Powered by Google Vision API
- ✓ Auto-extract items & prices
- ✓ Works with any printed receipt

Group Bill Splitting

- ✓ Assign items per person
- ✓ Automatic tax & service split
- ✓ Support for multiple participants

Payment Tracking

- ✓ Real-time payment status
- ✓ Mark transfers as complete
- ✓ Host verifies each payment

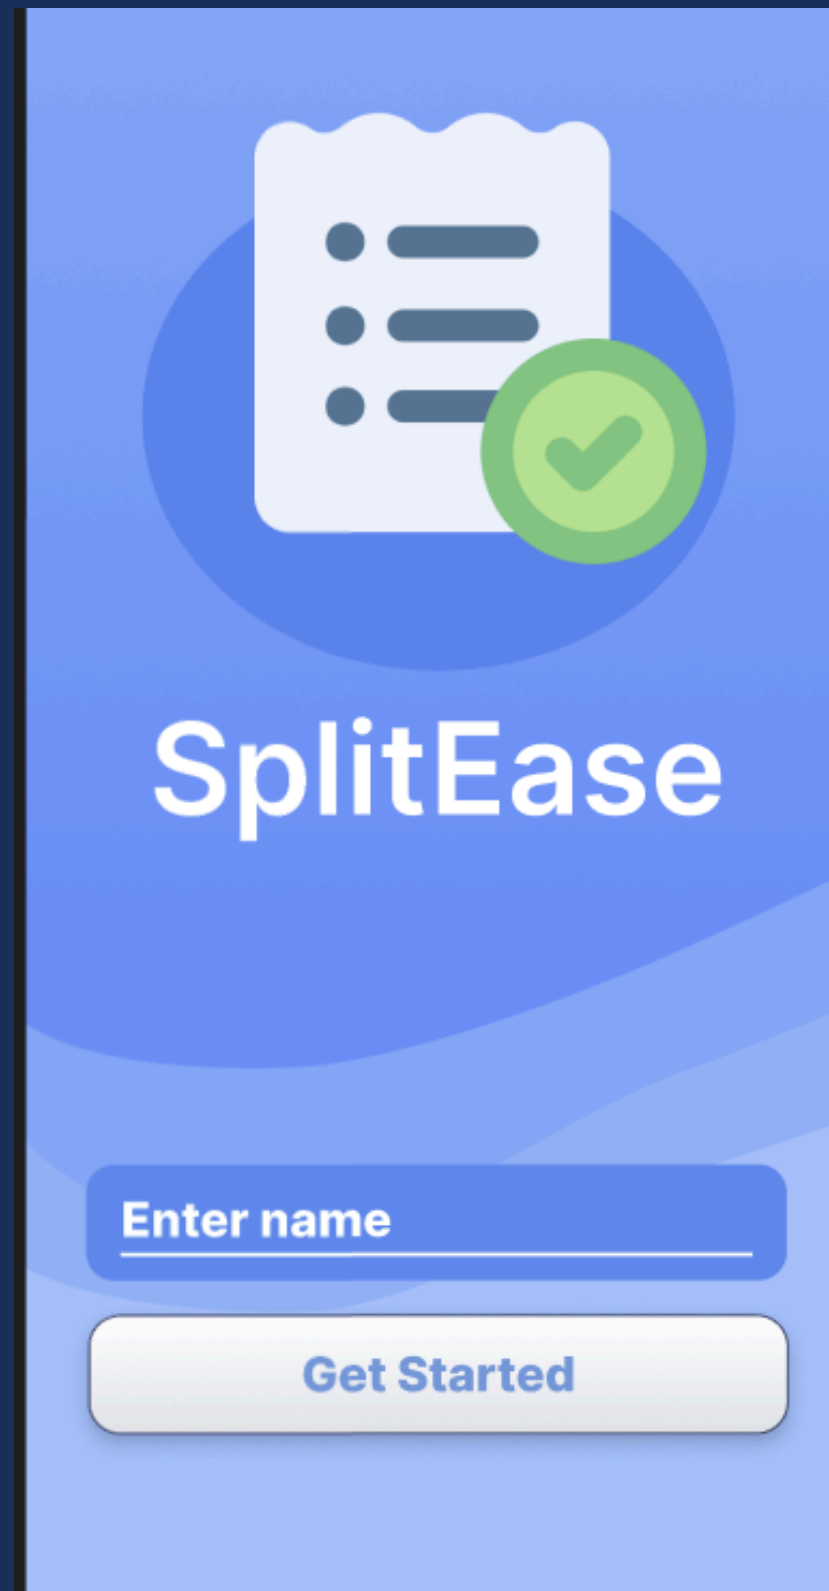

Receipt Management

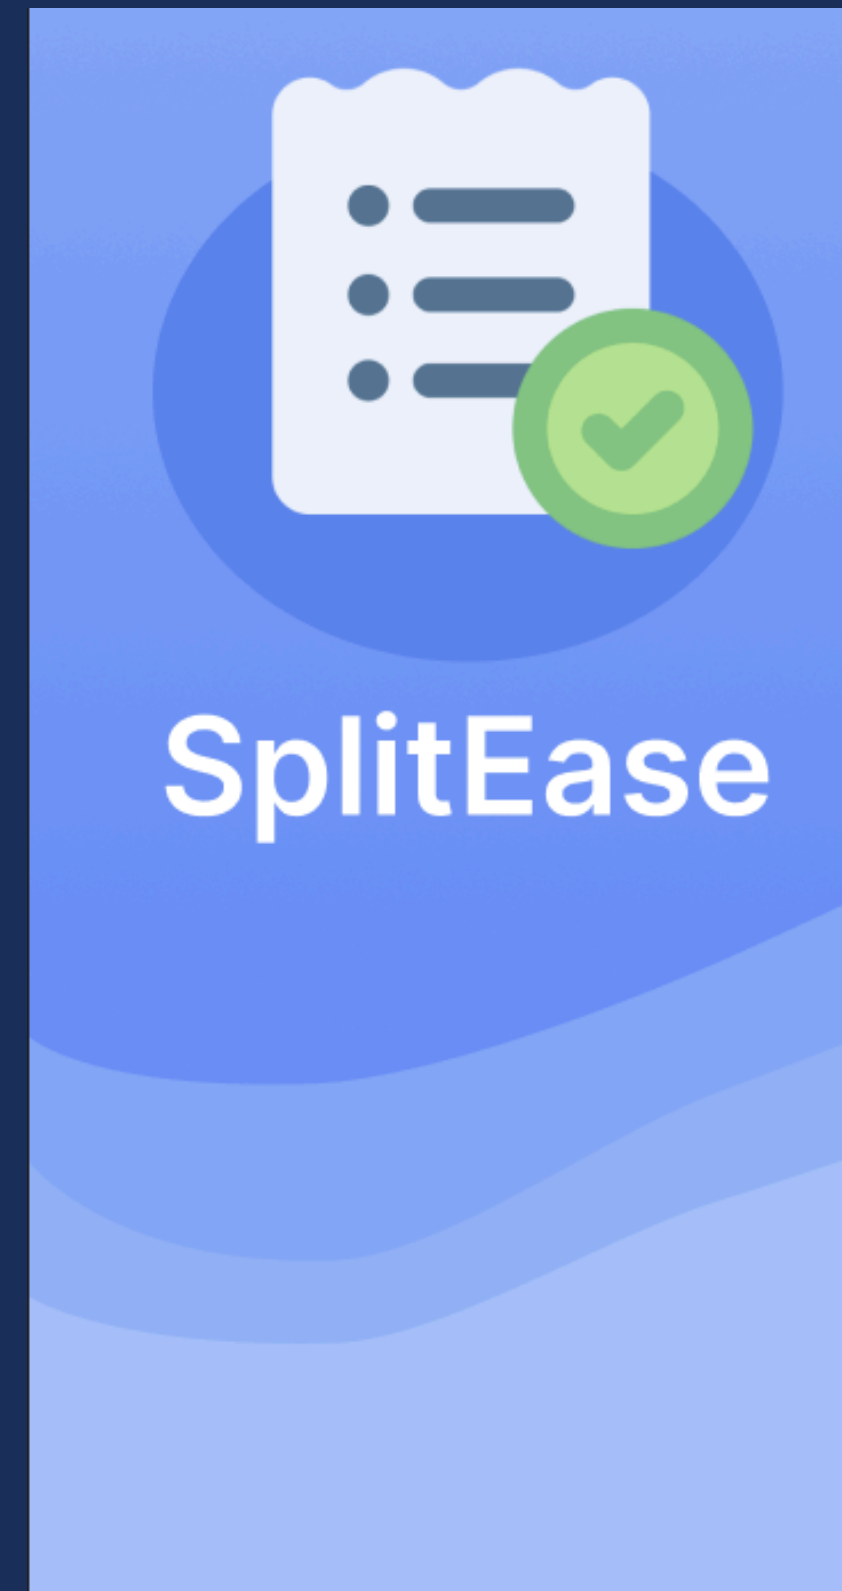

- ✓ Upload proof of transfer
- ✓ View payment receipts
- ✓ Complete payment history
